20050234989 [\[A\]](#) System and method for database lock with reference countingDisplay results by: [Publica](#)

Publication • Abs Title

20060206901	[A] Method and system for deadlock detection in a distributed environment	8-
20060190504	[A] Simulating multi-user activity while maintaining original linear request order for asynchronous transactional events	18-
20060184528	[A] Distributed database with device-served leases	14-
20060167878	[A] Customer statistics based on database lock use	27-
20060143062	[A] Dynamic capacity demand profile construction with a persisted capacity demand profile and a collision buffer	29-
20060136464	[A] System and method for object persistence	17-
20060136354	[A] Apparatus and method for data warehousing	17-
20060123199	[A] System and method for optimistic caching	25-
20060123065	[A] Methods, computer systems and software applications for providing a lock service	2-
20060123004	[A] Methods, computer systems and software applications for providing a central lock service	2-
20060123003	[A] Method, system and program for enabling non-self actuated database transactions to lock onto a database component	8-
20060117146	[A] Cache for an enterprise software system	30-
20060106860	[A] Method and apparatus for building index of source data	17-
20060074977	[A] Deferred incorporation of updates for spatial indexes	24-
20060059209	[A] Crash recovery by logging extra data	14-
20060036574	[A] System and method for an optimistic database access	11-
20060020911	[A] Managing long-lived resource locks in a multi-system mail infrastructure	26
20060010170	[A] Method and system using virtual replicated tables in a cluster database management system	8-
20060004885	[A] Multiple writer support in an OLAP environment	30-
20060004760	[A] Method, system, and apparatus for managing access to a data object	21-

Documents similar to:

20050234989 **A** System and method for database lock with reference countingDisplay results by: [Publica](#)**Publication Abs Title**

20060004758	A An Efficient Locking Protocol for Sub-Document Concurrency Control Using Prefix Encoded Node Identifiers in XML Databases	4-1
20060004757	A Method for releasing update locks on rollback to savepoint	18
20050289189	A Concurrent transactions and page synchronization	29-
20050289188	A Allocation locks and their use	29-
20050289143	A Method for managing lock resources in a distributed storage system	23-
20050278393	A System and method for discriminatory replaying of log files during tablespace recovery in a database management system	29-
20050262169	A Method and apparatus for synchronizing dataset object properties with underlying database structures	19-
20050262118	A Uninterrupted database index reorganization/movement	20-
20050251537	A File locking	5-1
20050234974	A Systems and methods in support of data base page synchronization	16-
20050234842	A System and method for increasing system resource availability in database management systems	31-
20050192962	A Apparatus, system, method for enabling web-applications to access enterprise managed data	26-
20050187983	A Method of maintaining data consistency in a loose transaction model	5-1
20050187933	A Methods, systems and computer applications for real time data processing	18-
20050182776	A Time-addressed database management system	16-
20050165818	A Removing overflow rows in a relational database	14-
20050155011	A Method and system for restricting access in a distributed job environment	12-
20050149526	A Systems and methods for maintaining transactional persistence	16-
20050144610	A Configuration manager in enterprise computing system	30-
20050144170	A Systems and methods for maintaining transactional persistence	16-

Publication Abs Title

20050138375	A Method and apparatus providing optimistic locking of shared computer resources	14-
20050131966	A Architecture of database application with robust online recoverability	15-
20050131899	A Adaptive object level locking	23-
20050125406	A Database access with multilevel lock	3-l
20050125325	A Efficient aggregate summary views of massive numbers of items in highly concurrent update environments	7-l
20050114609	A Computer-implemented system and method for lock handling	26-
20050108231	A Method for retrieving and modifying data elements on a shared medium	17-
20050102326	A Method and apparatus for performing conflict resolution in database logging	22-
20050102255	A Computer-implemented system and method for handling stored data	6-l
20050102250	A Automatic transaction management	6-
20050097116	A Method and system for adapting memory-resident database in flexible service logic execution environment	3-l
20050091180	A Method and apparatus for refreshing materialized views	22-
20050071569	A Methods and systems for distributed caching in presence of updates and in accordance with holding times	23-
20050071389	A High availability data replication of smart large objects	29-
20050071320	A Self-maintaining real-time data aggregations	26-
20050055445	A High availability data replication of an R-tree index	10-
20050022157	A Application management	23-
20050021537	A Self-describing business objects	23-
20050021355	A Side-effect modeling of a service-oriented business framework	23-
20050015425	A Transaction manager freezing	14

Display results by: Publica

Publication Abs Title

20050015353	A Read/write lock transaction manager freezing	14
20040267745	A Entry locking for large data structures	7-I
20040254933	A Library server locks DB2 resources in short time for CM implicit transaction	11-
20040236913	A Buffer installation method of supporting a detection-based and avoidance-based consistency maintenance policy in a shared disk-based multi-DBMS	14-
20040236746	A Timestamping in databases	22-
20040230621	A Method and system for altering a sequence number assignment pattern while preserving integrity and high concurrency in a multi-system shared disk environment	16-
20040225915	A Minimum latency reinstatement of database transaction locks	9-I
20040220934	A Performance optimization for data sharing across batch sequential processes and on-line transaction processes	19-
20040220933	A Method, system, and program for managing locks and transactions	1-I
20040220913	A Method, system, and program for lock and transaction management	1-I
20040215670	A Synchronization of plural databases in a database replication system	25-
20040215614	A Grid quorum	25-
20040205066	A System and method for a multi-level locking hierarchy in a database with multi-dimensional clustering	29-
20040199734	A Deadlock resolution through lock requeuing	3-
20040199512	A System and method for selective partition locking	2-
20040193622	A Logging synchronization	31-
20040193455	A Dynamic preloading of insurance product data in insurance policy management system	28-
20040186825	A Automatic lock management in an abstract database	20-
20040177099	A Parallel transaction recovery	18-
20040167927	A Method for concurrency control for a secondary index	19-

20040148283	A Event driven transaction state management with single cache for persistant framework	27-
20040139116	A Time in databases and applications of databases	19-
20040128328	A Method and apparatus for relaxed transactional isolation in a client-server caching architecture	31-
20040117372	A System and method for controlling access to system resources	17-
20040111422	A Concurrency classes for shared file systems	10-
20040088573	A Method and apparatus for providing dynamic locks for global resources	31-
20040078360	A Data locking system and method for medical system architecture	22-
20040073530	A Information management via delegated control	18-
20040049507	A Method and apparatus for obtaining storage information from a transaction log	10-
20040044648	A Method for data-centric collaboration	24-
20040025169	A Systems and methods for maintaining transactional persistence	29-
20040019892	A Lock management thread pools for distributed data systems	24
20040019679	A First thread lock management for distributed data systems	24
20040019660	A Lock holding multi-threaded processes for distibuted data systems	24
20040019639	A Last thread lock management for multi-threaded process and distributed data systems	24
20040010664	A Optimizing memory usage by vtable cloning	12
20040010591	A Employing wrapper profiles	20-
20040010502	A In-memory database for high performance, parallel transaction processing	12
20040010499	A DATABASE SYSTEM WITH IMPROVED METHODS FOR ASYNCHRONOUS LOGGING OF TRANSACTIONS	2-
20040006506	A System and method for integrating, managing and coordinating customer activities	29-
